Important Safety Instructions

Before using your Stewart Audio Inc. Product, please read this Owner’s Manual carefully to ensure optimum trouble-free performance.

WARNING: TO REDUCE THE RISK OF ELECTRICAL SHOCK, DO NOT EXPOSE THIS AMPLIFIER TO RAIN OR MOISTURE. DANGEROUS HIGH VOLTAGES ARE PRESENT INSIDE THE ENCLOSURE. DO NOT OPEN THE CABINET. REFER SERVICING TO QUALIFIED PERSONNEL ONLY.

The lighting bolt within arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of un-insulated “dangerous voltage” within the product’s enclosure that may be of sufficient magnitude to constitute a risk of electrical shock to person.

The exclamation point within an equilateral triangle, is intended to alert the user to the presence of important operating and maintenance (servicing) instruction in the literature accompanying the appliance.

Important Safety Instructions – Please Read Prior to Product Installation.

1. Installation should be performed by a trained and licensed professional to insure safe and lasting operation.

2. All of the safety and operating instructions should be read before the amplifier is installed or operated. Retain these instructions for future reference. All instructions should be followed; all warnings on the amplifier and in the operating instructions should be adhered to.

3. The unit should be situated so that its location and position does not interfere with its proper ventilation. For example, the unit must not be placed on a rug, bed, sofa or similar surface that impedes airflow across the chassis. Airflow through the ventilation openings should be unobstructed.

4. This unit should not be used near water, for example, near a bathtub, in a wet basement, near a swimming pool, etc. This unit is intended to be operated in a controlled indoor environment.

5. Do not place the unit near heat sources such as radiators, heat registers, stoves, or other appliances that produce heat.

6. The unit should only be connected to 120-240 VAC, 50-60 Hz power supply. Do not defeat the ground or polarization of the power plug.

7. Route power cord and other cables so that they are not likely to be walked on, tripped over or stressed. Pay particular attention to condition of cords and cables at plugs and at the point where they exit the amplifier. To prevent risk of fire or injury, damaged cords and cables should be replaced immediately.

8. Clean the unit with a clean, damp cloth. Do not use solvents or abrasive cleaners. Never pour any liquid on the unit.

9. When left unused for a long period of time, the power cord should be unplugged from the outlet.

10. Damaged units requiring service should be repaired by a qualified service technician when:
   a. The power cord or AC plug has been damaged.
   b. Objects have fallen, or liquid has spilled into the unit.
   c. The unit has been exposed to rain or other moisture.
   d. The unit does not appear to operate normally or exhibits a marked change in performance.
   e. The unit has been dropped or the enclosure damaged.

11. The user should not attempt to service the unit beyond that described in the operating instructions. All other servicing should be referred to qualified service personnel.
Congratulations on your purchase of the new Stewart Audio DSP 4x4. This unit has been designed and built to provide you with years of high-quality audio performance and trouble-free operation. If after reading this manual you should have any questions concerning amplifier installation and operation, please contact your Authorized Stewart Dealer, or you may contact us directly using the contact information provided on the back of this manual.

1.1 Features
Your Stewart Audio DSP 4x4 is the result of years of experience in the design and manufacture of quality audio products. As such it provides a combination of performance and operational benefits that simply cannot be found in conventional audio products:

- 4 channels of digital signal processing
- Configurable via USB Port [http://www.stewartaudio.com/DSPCC]
- RS–232 connection for remote control
- 1/3 rack package
- Made in the USA

1.2 Using this Manual
In order to obtain maximum performance from your DSP 4x4 please take time to read this brief owner’s manual and carefully follow the guidelines for connection and operation.

This manual provides you with the information necessary to safely install and operate your new DSP 4x4 in the most common scenarios. If you find yourself requiring additional assistance, please feel free to contact your Authorized Dealer, or you may contact us directly using the contact information provided on the back of this manual.
2 Setup

2.1 Setup Precautions

CAUTION: Before installing your unit, make sure that you have read the Important Safety Precautions at the beginning of this manual.

2.2 Product Installation

The DSP 4x4 incorporates a number of different mounting options in order to fit your installation needs.

2.2.1 Pole-Mounting

The DSP 4x4 has mount holes on the top of the unit which can be used with the AV-Pole bracket available from Stewart Audio.

2.2.2 Universal-Mount Installation

The DSP 4x4 also has a universal bracket available which allows the unit to be mounted against a wall or under a table. Two screws are included in the kit which will affix the bracket to the top of the unit. Once this is done, two holes are available for mounting the unit where desired.

CAUTION: Use only the screws provided in mounting brackets to the unit. Do not over tighten.
2.2.3 Product Dimensions

2.3 Input Connections

Your DSP4x4 is provided with a 3-pin Phoenix connector for each input. This connector will accept both balanced or unbalanced connections, however some modifications must be made for an unbalanced connection. See the next two sections for instructions on connecting the DSP 4x4 to its input source.

2.3.1 Balanced Connections

When using a balanced input source and connector, you must ensure that the hot, cold, and ground pins of the connector are matched up to the +, -, and ground pins of the DSP 4x4’s Phoenix connector respectively. Diagrams have been provided for standard XLR and TRS connectors. Please refer to the manual of your input source in case it does not follow the standard pin-out. Caution: Incorrect wiring may result in damage to equipment.
2.3.2 Unbalanced Input Connections

When using an unbalanced input source and connector, a jumper must be added between the negative (-) terminals and the ground terminals. Once this has been done, the unbalanced source can be connected to the positive (+) and ground terminals. Please refer to the manual of your input source in case it does not follow the standard pin-out. For your convenience, pre-wired connectors are available for purchase, see the next page for details.

**NOTE:** A jumper is required for connecting an unbalanced input.

Pre-wired unbalanced connectors are available for purchase from Stewart Audio. The summing adapters will properly sum a stereo source for use with the mono input on the rear of the DSP 4x4 without causing sound cancellation. Part numbers are found below the diagrams.

2.3.3 Phantom Power

The DSP 4x4 is designed with software-selectable 24VDC phantom power on all 4 channels capable of supplying 25mA per channel. This power level is sufficient to operate most condenser microphones in a typical DSP 4x4 application.

Phantom power can be switched on/off via the Input Block of the Stewart Audio Control Center Software (http://www.stewartaudio.com/DSPCC) or using RS-232 commands documented in Section 3.3.

When phantom power is being supplied on a channel, the appropriate LED indicator on the rear of the DSP 4x4 will illuminate.

**CAUTION:** Microphones or other input devices which do not require phantom power can be permanently damaged by the application of phantom power. Stewart Audio will not be held responsible for damage to these devices.
2.4 Output Connections

Your DSP 4x4 is provided with a 3-pin Phoenix connector for each output. This connector offers a balanced output to interface with the input of another device.

Connection methods for balanced and unbalanced outputs are identical as the methods for inputs as referenced in Section 2.3.

2.5 RS-232 Connection

Your DSP 4x4 can be controlled using the RS–232 connection on the rear of the device. For the available RS–232 commands, see Section 3.3.

All communications should be performed at 9600 baud, 8 bits, 1 stop bit, no parity, and no flow control.

3 Operation

3.1 Operating Precautions

1. Before use, your DSP 4x4 must be configured to customize its operation, including input and output wiring hookup. Improper wiring can result in damage to equipment or potentially harm to the operator. Consult Section 2 for setup instructions.

2. Tampering with the circuitry, or making unauthorized changes is not only dangerous but may also violate local regulations.

3. Use care when making connections between the unit and the input or output equipment.

NOTE: Stewart Audio will not be held responsible for damage to your DSP 4x4 or connected equipment if the instructions in this manual are not followed.

NOTE: For additional operating precautions, please refer to “Important Safety Instructions” located on Page 2.
3.2 Controls and Indicators

3.2.1 Controls

The DSP 4x4 is configured entirely via USB programming (http://www.stewartaudio.com/DSPCC). An RS–232 connection allows remote control of select functions (see section 3.3). There is no power switch so the unit will remain on continuously when plugged in. Due to the inherently low power consumption design, there is no need for a sleep mode.

3.2.2 Indicators

The DSP 4x4 has 2 sets of LEDs to indicate power, and phantom power.

The green power LED on the front of the device will illuminate whenever the unit is plugged in.

The green phantom power LED’s will illuminate when 24VDC phantom power is being applied to a channel. This is switched via the DSP Control Center Software. For more information, please reference the DSP Control Center Software manual (http://www.stewartaudio.com/DSPCC).
3.3 RS-232 Commands

<table>
<thead>
<tr>
<th>Command Name and Description</th>
<th>Hex Command</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>TRIM</strong></td>
<td>0x12 AMOUNT(^1) CHAN(^2) 0x03</td>
</tr>
<tr>
<td>Changes trim by AMOUNT(^1) on CHAN(^2)</td>
<td></td>
</tr>
<tr>
<td><strong>VOLUME_DISCRETE</strong></td>
<td>0x12 0x06 CHAN(^2) VOL(^3) 0x03</td>
</tr>
<tr>
<td>Sets CHAN(^2) volume to VOL(^3)</td>
<td></td>
</tr>
<tr>
<td><strong>VOLUME_STATUS</strong></td>
<td>0x12 0x07 CHAN(^2) 0x03</td>
</tr>
<tr>
<td>Return CHAN(^2) volume in the format: 0x06 VOL(^3) 0x0A</td>
<td></td>
</tr>
<tr>
<td><strong>FORCE_MUTE_ON</strong></td>
<td>0x12 0x08 CHAN(^2) 0x03</td>
</tr>
<tr>
<td>Turn mute off for CHAN(^2)</td>
<td></td>
</tr>
<tr>
<td><strong>FORCE_MUTE_OFF</strong></td>
<td>0x12 0x09 CHAN(^2) 0x03</td>
</tr>
<tr>
<td>Turn mute on for CHAN(^2)</td>
<td></td>
</tr>
<tr>
<td><strong>MUTE_TOGGLE</strong></td>
<td>0x12 0x10 CHAN(^2) 0x03</td>
</tr>
<tr>
<td>Toggle mute on CHAN(^2)</td>
<td></td>
</tr>
<tr>
<td><strong>MUTE_STATUS</strong></td>
<td>0x12 0x11 CHAN(^2) 0x03</td>
</tr>
<tr>
<td>Return CHAN(^2) mute status in the format: 0x06 MUTE(^5) 0x0A</td>
<td></td>
</tr>
<tr>
<td><strong>CHANGE_PRESET</strong></td>
<td>0x12 0x12 PRESET(^3) 0x03</td>
</tr>
<tr>
<td>Change to PRESET(^3)</td>
<td></td>
</tr>
<tr>
<td><strong>FIRMWARE_VERSION</strong></td>
<td>0x12 0x13 0x13 0x03</td>
</tr>
<tr>
<td>Returns the current version in the format:</td>
<td></td>
</tr>
</tbody>
</table>

1 The AMOUNT is as follows:
   - 0x01 = Up 10%, 0x02 = Up 5%,
   - 0x04 = Down 10%, 0x05 = Down 5%
2 The CHAN is as follows:
   - 0x00 = all channels, 0x01 = CH1, 0x02=CH2, etc..
3 The VOLUME is in the range 0-100 expressed in hexadecimal. This equates to a range of 0x00 - 0x64
4 The PRESET is zero-based in the range 0x00 - 0x09
5 The MUTE is in the format 0x00 = Unmuted, 0x01 = Muted

4 Troubleshooting

**Problem: No power LED indicator**

**Procedure:** Ensure that only the provided 5VDC 2A power supply has been used and that it is connected to a live power outlet supplying 100-240VAC.

**Problem: No RS-232 communication**

**Procedure:** Ensure that the connections are done as specified in Section 2.5. Check that the communication is at 9600 baud. Shorten the cable lengths to see if it affects the communication.

**Problem: No output on individual channel**

**Procedure:** Refer to the DSP Control Center Software manual (http://www.stewartaudio.com/DSPCC) for instructions on using live mode to meter the signal in the DSP signal path. If a condenser microphone is in use, ensure phantom power is being supplied. Check input connections (see Section 2.8). Check that the volume on the audio source is at a sufficient level.
5 Technical Specifications

**Frequency Response**
20Hz—20kHz ±0.2dB

**THD+N**
<0.007%

**Signal-to-Noise Ratio**
>120dB at 0dB gain

**Unweighted Crosstalk**
<-95dB

**Input Sensitivity**
-24dB to +0dB

**Input Impedance (Balanced/Unbalanced/Phantom)**
20kΩ, 10kΩ, 2.4kΩ

**Phantom Power**
24VDC @ 25mA Software Controlled

**D/A Conversion**
24-bit, 48kHz

**Current Draw**
400mA @ 5VDC

**Input Connectors**
3.5 Euro Block

**Output Connectors**
3.5 Euro Block

**LED Indicators**
Power, Phantom Power

**Controls**
USB (Programming), RS–232 (Operation)

**Serial Control Port**
Bidirectional RS–232

**Baud Rate & Protocol**
9600 baud, 8 bits, 1 stop bit, no parity, no flow control

**USB Control Port**
Front panel female mini USB-B

**USB Standards**
USB 2.0 Low Speed

**Program Control**
Stewart Audio DSP Control Center

**Power Supply Input**
External in-line 5VDC (Universal Input AC/DC Supply Included)

**Construction**
Aluminum Chassis

**Cooling**
Convection-Cooling

**Mounting**
Universal Bracket, Pole-Mountable

**Dimensions**
1.7" (4.3cm) H x 6.2" (15.7cm) W x 4.0" (10.3cm) D

**Weight**
0.6lbs (0.3kg)

**Regulatory**
CE

**Environmental**
RoHS

**Warranty**
3 years

6 Warranty Information

6.1 Warranty Summary

All Stewart Audio amplifiers and accessories, unless excluded in this summary, are covered by a 3-year limited warranty on parts and labor from the date of purchase. In order to be eligible for warranty repairs, the amplifiers and accessories must have been purchased through an authorized Stewart Audio dealer and submitted by the original purchaser. This warranty is only valid in the country in which the amplifier was purchased.

6.1.1 Eligibility Requirements.
Stewart Audio warrants against all malfunctions which come as a result of component or manufacturer defect. The amplifier is also covered from all failures which arise during the warranty period (3 years from date of purchase) that are not a result of misuse. The following actions will void your warranty:

- The power cord or AC plug has been damaged through misuse.
- The amplifier has been exposed to moisture or extreme temperatures.
- The amplifier has been dropped, items have been dropped on the amplifier, or the enclosure has been damaged.
- The amplifier has been opened by the operator.
- The amplifier was improperly packaged when sending to the factory for repair, resulting in damage.
- Any of the precautions or instructions found in this manual were not followed.

Damages resulting to the amplifier which are not covered under this warranty can be factory-repaired at cost to the customer. Use the contact information below to initiate the repair process.

6.2 Return Procedure

This section includes the return procedures which must be followed in order to prevent processing delay or cost to the customer. Please read the entire section before contacting Stewart Audio for returns.
6.2.1 Return Authorization Number
All returns to the factory for service must be accompanied by a Return Authorization (RA) number. One can be obtained by contacting Stewart Audio at (209) 588-8111 or via e-mail at support@stewartaudio.com.

NOTE: Any defective products received without an RA number will be returned to sender at their expense.

If Stewart Audio is unable to contact the sender in 14 days, the merchandise will be considered scrap and may be disposed of.

6.2.2 Shipment Instructions
If Stewart Audio requests that you ship the defective product back to their service center, please refer to the guide below. To ensure prompt warranty service, be sure to follow all instructions.

1. Return Authorization (RA) is required for product being sent to the factory for service.
2. See packing instructions in Section 6.2.3.
3. Ship the defective product using a method which provides for order tracking or order confirmation. The service center is located at the following address:

   Stewart Audio
   14397 Cuesta Court Suite D1
   Sonora, CA 95370

4. Use a bold black marker and write the RA number on three sides of the box.
5. Record the RMA number for future reference. The RA number can be used to check the repair status.

6.2.3 Packaging Instructions (cont.)
1. Please write the RA number on three sides of the box. Include the Stewart Audio RA number inside the box and a brief description of the problem.
2. You will be advised during the RA process what accessories should be included with the amplifier (Power supplies, connectors, cords, etc.). This is dependent on the failure assessment.
3. When shipping your amplifier, it is important that it has adequate protection. We recommend you use the original packing material when returning the product for repair. If you do not have the original box, see number 4.
4. If you provide your own shipping pack, the minimum recommended requirements for materials are as follows:
   a. 275 P.S.I. burst test, Double-Wall carton that allows for 2-inch solid Styrofoam on all six sides of unit or 3 inches of plastic bubble wrap on all six sides of unit.
   b. Securely seal the package with an adequate carton sealing tape.
   c. Do not use light boxes or “peanuts”.

NOTE: Damage caused by poor packaging will not be covered under warranty.

6.2.4 Payment of Non-Warranty Repairs
Payment for non-warranty repairs must be submitted to Stewart Audio before the product will be returned to the customer.
7 Accessories

The following accessories are available from Stewart Audio for your amplifier.

All part numbers shown are Stewart Audio Part Numbers.

Mounting Brackets
AV-POLE Pole-mount bracket for AV Series amplifiers
AV-BRACKET Universal mounting bracket for AV Series amplifiers

Connection Adapters
ADPT-RCA Mono Female RCA to male Euroblock.
ADPT-SUMRCA Stereo Female RCA to male Euroblock.
ADPT-SUM35 Stereo Female 3.5mm to male Euroblock

Wall Plates
WP-RVC-B Wallplate with 10k potentiometer and knob for remote volume control (Black)
WP-RVC-A Wallplate with 10k potentiometer and knob for remote volume control (Aluminum)
